

Beacham's Clock Co. 300 W. Hood St. Sisters OR 97759 Ph 541-549-9971

Multi-Dial Large Wall or Floor Clock

Our latest movement design is a large 3/16" thick Brass plate format complete with the unique and unusual Gravity Escapement. The Skeleton gear train is exposed through the center of the dial. The calendar functions include, phases of the moon, Days of the week, Sunrise/Sunset, Sidereal conversion for solar noon and a year calendar surrounding the time dial. The face has a rotating antique globe showing current noon on earth. The cases are styled after the famous E. Howard 67 and are constructed of solid Honduras Mahogany with Black Walnut Burl accents. The case dimensions are 94" tall 30.5" wide 14" deep. The weights are made of steel with enclosed pulleys and run in their own track. The entire movement is Jeweled using sapphire jewels with olive hole profiles to reduce the friction surfaces. The steel shafts have been heat treated to Rockwell 45C which will give flawless service to several generations of proud owners. It is our goal that these clocks be the best runners in your collection, and to that end we offer a lifetime warrantee. Thank you for your interest and support. Sincerely, C.E. Beacham III

Our price is \$30,000
